# THE REPORT

OF THE

PRESIDENT OF QUEEN'S COLLEGE, GALWAY

FOR

THE SESSION 1902-1903.

---

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

I have the honour of submitting to Your Majesty the following Report of the proceedings and condition of Queen's College, Galway, for the session ending 13th June, 1903.

The usual Tables of Statistics will be found in the Appendices.

I am able to report a good increase in the number of students attending the College. For the session 1901-02 the number was 93, and for the past session 118. This is the largest number for any session during the last twenty years, with the exception of two, 1889-90 and 1893-94, when the numbers were 122 and 120 respectively. Of these 118 students 57, or almost one-half, came from the Province of Connaught, and 33 from the Province of Ulster, showing that the allegation that most of the students come from Ulster is unfounded. Of a total of 47 Scholarships awarded, 26 were gained by students from the counties of Galway, Roscommon, Longford, and Clare, 17 being awarded to students from the county of Galway alone.

These facts are instructive in view of a statement made before the recent Royal Commission on University Education in Ireland by one whose evidence doubtless carried great weight—that "they," the Galway students, "are clever young fellows from Ulster, who see an opportunity of using these Bursaries for their own advancement."

In the examinations of the Royal University in 1902 the success of this College was again marked. The distinctions gained were :—

Exhibitions.—3 First Class.

5 Second Class.

Honours.—6 First Class.

11 Second Class.

In addition, Mr. Thomas Stuart, M.A., D.Sc., gained the high distinction of the Junior Fellowship in Mathematical Science, and Miss Cecilia Steinberger, B.A., the "Dr. and Mrs.

Browne " Gold Medal and Prize, given to the Royal University by Dr. W. A. Browne, an *alumnus* of Queen's College, Galway, for proficiency in the colloquial knowledge of the French and German languages.

Mr. T. G. Strain, a student of this College, has been awarded an Entrance Scholarship at St. John's College, Cambridge, taking first place in the examination, and Miss Frances L. Thompson, another student, has been awarded the " Mary Anne Leighton Scholarship " for Classics in Girton College, Cambridge.

In past years I have referred to the research work done in the College, as I hold strongly that such work is one of the important functions which a University College is called upon to discharge.

The following are some of the papers published during the past session :—

(1.) By Professor T. J. I'a Bromwich :—

- (a.) " The Discriminant of a Family of Curves or Surfaces." (In conjunction with Mr. R. W. H. T. Hudson, Fellow of St. John's College, Cambridge, and Lecturer at University College, Liverpool.) (*Quart. Jour. of Math.*)
- (b.) " The line of Inflections of a Plane Unicursal Cubic." (*Mess. of Math.*)
- (c.) " The Caustic by reflection of a Circle." (*Amer. Jour. of Math.*)
- (d.) " Note on Double Limits and on the Inversion of a Repeated Infinite Integral." (*Proc. Lond. Math. Soc.*)
- (e.) " On similar Conics through three Points." (*Trans. Amer. Math. Soc.*)

(2.) By Professor R. J. Anderson :—

- (a.) " Occipital Condyles in Mammals." (*Brit. Med. Assoc., Manchester.*)
- (b.) " Some points in the Anatomy of the Pilot Whale." (*Brit. Assoc., Belfast.*)
- (c.) " A contribution to the circulation in Plant Stems." (*Brit. Assoc., Belfast.*)
- (d.) " The Relations of the Ante-inferior angle of the Parietal Bone in Primates." (*Brit. Assoc., Belfast.*)
- (e.) " The Premaxilla in Primates." (*International Med. Congress, Madrid.*)
- (f.) " Muscle moulding and its significance." (*International Med. Congress, Madrid.*)

In the Chemical Laboratory, research work has, as usual, taken a prominent place. Professor Senior has further prosecuted the study of a naphthacridine, a compound whose discovery is due to him and his assistant, Mr. Goodwin. He has

also continued his further study of acridine synthesis by the interaction of certain aromatic compounds and methylene diiodide. In these investigations he was assisted, first, by Mr. Goodwin, and, then, by Miss Micklethwaite, A.R.C.S.

In addition to these inquiries he has made further progress in the examination of the constitution of cyanuric acid, assisted by Mr. Thomas Walsh, B.A.

Investigations conducted by Professor Senier and Mr. W. S. Mills, M.A., are also in progress with a view to extending some recent discoveries in Organic Chemistry and applying them to photographic manufacturing processes. This work has so far advanced that a preliminary report has just been completed.

The subsequent careers of students after leaving this College bear testimony to the quality of the educational training received in its class-rooms. It is with much satisfaction that I refer in this connection to the following examples which seem to call for special mention :—

Mr. Frank S. Rishworth, B.E., B.A., who entered this College as First Science Scholar in 1894, has been appointed Instructor in Engineering under the Egyptian Ministry of Education. Dr. Wm. H. Maxwell, who entered this College in 1869 as First Literary Scholar, has achieved remarkable distinction in the educational world, and is now Chief Superintendent of Schools in New York. "He is head of the largest and finest public school system in the world, and directs, perhaps, the most diversified curriculum arranged by an educational authority. His staff numbers fourteen thousand."\* Mr. William Gannon, M.A., who entered this College as First Science Scholar in 1886, has just been appointed Principal of the Woolwich Polytechnic. He has been selected out of more than a hundred applicants to draw up and carry through a scheme of educational organisation in this important centre of industry. Mr. William Goodwin, who, during the past year, has been engaged with Professor Tollens at the University of Göttingen in investigations connected with Chemistry in its relations to Agriculture, has had his 1851 Exhibition Scholarship renewed for a second year, and has obtained permission to work, during the coming Session, with Professor Maquenne at the Muséum d'histoire naturelle in Paris. A paper by Mr. Goodwin on *phloroglucid* is about to be published in the *Berichte der deutschen chemischen Gesellschaft*. The 1851 Exhibition Scholarship of Mr. W. S. Mills was exceptionally renewed for a third year on the ground of researches done with Professor Harries in the University of Berlin. These researches include papers on :—

- (a.) "The Constitution of Isothujon,"
- (b.) "The Action of Oxides of Nitrogen on Oximido Compounds," and
- (c.) "The Preparation of Oximido Compounds."

\* *Irish Times*, June 1st, 1903.

Mr. Mills has also completed researches on—

- (a.) "The Synthesis of Bromoglucosides leading to Aminoglucosides,"
- (b.) "The Preparation of Synthetical Glucosides," and
- (c.) "The Synthesis of Galactosides," the first with Professor Emil Fischer of Berlin University, and the others with Professor Ryan of University College, Dublin, who was himself a student of this College.

The results to which I have above referred as well as those to which I have had the privilege of referring in past years have been achieved in the face of many difficulties. All the departments of the College are much in need of additional grants for apparatus and assistance. The Biological and Pathological laboratories are altogether inadequate, the rooms set apart for the study of these subjects being most unsuitable. The need for additional endowment is a matter of pressing importance. It requires no argument to support the contention that the amount considered necessary for the working of a College twenty or thirty years ago falls far short of present needs. The following recommendations and report which I have received from the Professor of Anatomy and Physiology in reference to his own department will serve as an example of the defective equipment which generally exists in the College and the urgent need for additional endowment :—

- (1.) "The Anatomical Museum should be renewed. The method of mounting specimens practised at the time it was formed is now antiquated. Every specimen mounted in the old way should be moved into glass-covered jars.
- (2.) "A new set of formalin-hardened specimens should be prepared.
- (3.) "Whatever is possible should be done to provide more floor-space. The experimental, chemical, and histological branches of Practical Physiology would fill the whole space of the museum, and more, if properly fitted out.
- (4.) "The Pathological specimens should be mounted in the same way. They are mixed up with the others and, if it could be done, a separate museum for them should be provided.

"These difficulties are not peculiar to Galway. The old schools are renewing their stock of specimens and adding new buildings on every side. To expect a museum to grow of itself without a curator charged with the care of it is not reasonable. A curator was mentioned by my predecessor in several of his reports; the Professor of Anatomy in Belfast is about to make a similar application now, his museum being in pretty much the

same condition as mine. I think a curator should be appointed here at a reasonable pay, for, whatever might have been expected of the Professor of Anatomy when his emoluments were adequate, it could not be expected that he should devote his vacation to the work of a curator with the present income of the chair. The Professor of Anatomy in Edinburgh University receives £1,400 as Professor, and £200 as curator of the museum.

"What I have done in the direction of improvements is this : A new refurnishing of the old Dissecting Room ; an attempt to get up some sort of Chemical Laboratory for Physiology students ; a fairly good Experimental Physiology installation. I have bought a good deal of glass ware in the hope that I might have secured a good man as Porter. I have found that everybody is anxious to hear of such a man, and, when found, he is worth £100 a year—far beyond what I understood would be allowed for a Porter here."

But it is sufficient to refer in this connection to the recent Report of the Royal Commission on University Education in Ireland. It states that "it should be clearly understood that these Colleges (Cork and Galway) are insufficiently equipped for the purposes of University Education, and that the equipment which barely satisfied the scientific needs of the middle of the last century, is lamentably insufficient at the present day." No additional endowment to these Colleges is, however, recommended until they "are in a position more adequately to spread the advantages of education among the population of the South and West, which is mainly Roman Catholic." I venture to predict that, until the *Colleges are sufficiently equipped*, this most desirable end will not be attained.

I regret to have to report a serious loss to the College in the death of Professor Philip Sandford, M.A., at the early age of 48. No member of the staff took a deeper interest in the welfare of the College. His various contributions to Classical Literature are marked by that originality and freshness which characterised his lectures. But he was more than a Scholar and a Professor. He was the friend and companion of the students, ever ready to give them the benefit of his counsel and advice.

Mr. C. F. Bastable, LL.D., who has been Professor of Political Economy and Jurisprudence in this College since March, 1883, has resigned his Chair on being appointed to a Professorship in Trinity College, Dublin.

The Right Honorable the Earl of Westmeath and the Right Honorable Lord Clonbrock, K.P., have been appointed, under the Royal Sign Manual, Visitors of the College.

Testified by Your Majesty's most faithful subject and dutiful servant,

ALEX. ANDERSON, *President.*

## REPORTS of DEANS of RESIDENCES for the Session 1902-1903.

"The Rectory, Galway,  
"22nd July, 1903.

"The President,  
"The Queen's College,  
"Galway.

"DEAR SIR,—I beg leave to report that the conduct of the Church of Ireland students of the Queen's College, Galway, during the session 1902-3 was—as far as my observation went—very good.

"They were regular in their attendance at church, as a rule. I am not aware that anything occurred during the session that requires special notice.

"I remain, dear Sir,  
"Yours very truly,  
"J. FLEETWOOD BERRY."

"Spires House,  
"Galway,  
"17th July, 1903.

"DEAR MR. PRESIDENT.—I beg to report that during the session 1902-03, the conduct of the students under my care was satisfactory. The attendance at public worship and the Bible Class was above the average, and, in very many cases, most exemplary.

"The Students' Christian Union had a very successful session.

"I am,  
"Yours sincerely,  
"J. COURTENAY CLARKE."

"Methodist Manse,  
"Galway.  
"July 20th, 1903.

"DEAR MR. PRESIDENT.—It affords me pleasure to be able to testify that the character and deportment of the students under my care for the past year have been excellent.

"Yours very truly,  
"HUGH M'GAHIE."
